

# 'Goldflame' Honeysuckle

Lonicera x heckrottii 'Goldflame'

An award winning fragrant honeysuckle with pinky red outer, orange coloured inner summer flowers, which are followed by red berries in hot summers. The deciduous to semi-evergreen leaves are dark green, contrasted with blue hues beneath and provide a striking display even when the flowers have not opened.

Ideal for training over arches, pergolas, trellis or left to ramble up trees. The autumnal berries provide an excellent source of food for the garden wildlife whilst the strong fragrance is intoxicating to butterflies.
