

# Ninebark 'Diablo'

Physocarpus Opulifolius 'Monlo'

With striking plum-burgundy foliage, 3-5" clusters of creamy white flowers, attractive red seedpods and distinctive peeling bark, this hardy eastern Ninebark is the perfect shrub!

Tough and quick-growing, this shrub will reach 6-8' tall and wide, making it an ideal focal point in the garden.

Loved by bees, butterflies and songbirds, the 3-5 lobed 4" leaves on this deciduous shrub quickly appear in late winter, followed by blooms in April or May. Makes a sophisticated statement when planted in contrast to green and yellow foliaged plants. Can be used as a hedge, screen or for erosion-control on banks and hillsides - excellent for fire-scaping!
