

Chinese Juniper 'Gold Star'

Juniperus Chinensis 'Bakaurea'

Gold Star Juniper is a multi-stemmed evergreen shrub with a shapely form and gracefully arching branches. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub.

It is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Gold Star Juniper is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
