Discription

Little bluestem is a tidy, finely textured clumping grass with a blue-green summer color. Its silvery seed heads rise to a height of nearly 2 feet in late summer and are at their best when backlit in the morning or afternoon sun. In fall, the grass turns a rosy rust color that lasts all winter.

Care: It is widely adaptable to most soils, except for wet or highly fertile ones. Grow in full sun. Trim close to the ground in spring; it is late to emerge.
